NTLDEV 7192 與 NTLDEV 7191
課程專用報告（研究紀要）模板

NTLDEV 7192 and NTLDEV 7191
Course Report Template/Research Note

姓名 / Name*

October 24, 2026

*系所、學號與電子郵件。Department, student ID, and email.

摘要 / Abstract

[Write your abstract here. You can then comment out the text below using the percent sign.]

注意：Overleaf 專案名稱。請將 Overleaf 專案名稱改為「課程代碼-姓名-學號」，方便我在專案列表中辨識課程、學生姓名與學號。主檔維持 `main-template.tex` 或直接覆蓋 `main.tex` 均可。

Important: Overleaf project name.

Rename your Overleaf project to `CourseCode-YourName-StudentID`. This helps the instructor identify your course, name, and student ID in the project list. You can keep the main file named `main-template.tex` or rename it to `main.tex`.

篇幅提醒：摘要至多 1,000 字，建議控制在 500 字以內，以便日後修改並用於研討會投稿。投稿時請以各研討會的摘要格式與篇幅規定為準。

Length guidance: The abstract must not exceed 1,000 words; preferably keep it within 500 words to facilitate adaptation for conference submissions. Follow the specific abstract format and length requirements of the target conference.

本版模示範比較立法報告常用的文字格式、章節、圖片、表格、公式、交叉引用與文獻引用。請將示範文字替換成自己的研究問題、資料、方法與發現。所有示範數字均為教學用途，不代表實證結果。

This template demonstrates text formatting, sections, figures, tables, equations, cross-references, and citations for a comparative legislative studies report. Replace the examples with your research questions, data, methods, and findings. All numerical examples are for teaching and do not represent empirical results.

目錄 / Contents

1 緒論 / Introduction **4**

1.1 研究動機與問題 / Motivation and Questions 4

1.2 條列與連結 / Lists and Links 4

2 西敏制下的投票 / Voting in the Westminster System **4**

2.1 研究假設 / Research Hypothesis 5

3 表決、跑票與辯論資料 / Data on Divisions, Defection and Debates **5**

3.1 資料來源與變數 / Data Sources and Variables 5

4 跑票分析 / Analysis of Rebellion **6**

4.1 公式排版 / Formatting Equations 6

4.2 結果與交叉引用 / Results and Cross-References 7

5 結論 / Conclusion **7**

參考文獻 / References **8**

A 常用指令速查表 / Common Command Quick Reference **8**

A.1 文獻引用指令與實例 / Citation Commands and Examples 11

1 緒論 / Introduction

1.1 研究動機與問題 / Motivation and Questions

在此說明研究背景、問題意識與研究貢獻。例如：不同議會制度下，政黨如何維持議員的投票一致性？

Describe the background, research question, and contribution. For example: How do parties maintain voting unity under different parliamentary systems?

這是一個新段落。使用 粗體強調關鍵概念，使用 *emphasis* 標示英文重點。特殊字元需要跳脫，例如百分比 25%、底線 party_id、& 與 #。註腳可以補充資料來源或定義。[1]

Use a blank line to start a new paragraph. Use **bold** for key concepts and *emphasis* for emphasis. Escape special characters, such as 25%, party_id, &, and #. Footnotes can provide sources or definitions.

1.2 條列與連結 / Lists and Links

- 研究對象：國家、議院或政黨。

  Cases: countries, chambers, or parties.

- 分析單位：議員、單次表決或議員與表決的組合。

  Unit of analysis: legislators, divisions, or legislator–division observations.

1. 提出研究問題與理論預期。

   State the question and theoretical expectations.

2. 整理資料，定義變數並進行分析。

   Prepare the data, define variables, and conduct the analysis.

3. 回應問題並說明研究限制。

   Answer the question and discuss limitations.

網址可使用 https://www.parliament.uk/，也可使用 自訂連結文字。

Use `itemize` for bullet points and `enumerate` for numbered steps. Use `\url` for a visible URL, or `\href` for custom link text.

2 西敏制下的投票 / Voting in the Westminster System

Cox (1987) 的著作可作為理解英國議會制度發展的閱讀起點。括號式引用的寫法如下 (Cox, 1987)。一次引用多筆文獻可寫為 (Cox, 1987; Carey, 2009)。

The work of Cox (1987) offers a starting point for reading about the development of British parliamentary institutions. Parenthetical citations look like this (Cox, 1987); multiple sources can be cited together (Cox, 1987; Carey, 2009).

[1] 這是註腳範例，請替換成必要的補充說明。This is a sample footnote; replace it with a useful note.

指定頁碼的語法為：/ Syntax for citing specific pages:

```
\parencite[23--25]{cox1987}
```

以上頁碼僅示範語法；請核對原文後填入真正支持論點的頁碼。

The command above demonstrates a citation with page numbers. The pages are illustrative; check the source and enter the pages that support your claim.

> 這裡是區塊引文的排版示範，並非任何文獻的原文。實際使用時應填入經核對的引文，並附作者、年份與頁碼。
>
> This is a block quotation formatting example, not a quotation from a source. Replace it with a verified quotation and cite the author, year, and page.

2.1 研究假設 / Research Hypothesis

H1：請在此寫出可由資料檢驗的理論預期，並交代理論理由。

H1: State a testable expectation and explain its theoretical basis.

3 表決、跑票與辯論資料 / Data on Divisions, Defection and Debates

3.1 資料來源與變數 / Data Sources and Variables

在此交代研究期間、資料來源、樣本選擇、缺漏值處理與變數定義。下列圖片是隨版模附上的占位圖，請換成自己的圖表。

Describe the study period, sources, sample selection, missing data treatment, and variable definitions. Replace the placeholder below with your own figure.

如圖 1所示，可以在內文引用圖片編號。換圖時將 PNG、JPG 或 PDF 放入 `images/`，再修改 `\includegraphics` 的檔名。

Refer to Figure 1 in the text. To replace the image, put a PNG, JPG, or PDF in `images/` and update the filename in `\includegraphics`.

表 / Table 1: 變數定義與示範值 / Variable Definitions and Illustrative Values

變數 / Variable	定義 / Definition	值 / Value
跑票次數 Defections	議員投票與所屬政黨立場不一致的次數。 Votes against the party position.	8
參與表決次數 Votes cast	納入分析的有效表決次數。 Valid votes included in the analysis.	100
跑票比例 Defection rate	跑票次數除以參與表決次數。 Defections divided by votes cast.	0.08

註：所有數字僅用於排版練習。

Note: All values are fictional and used for formatting practice.

表 1示範三線表；欄位中的 `l`、`r` 與 `X` 分別表示靠左、靠右與可自動換行的欄位。

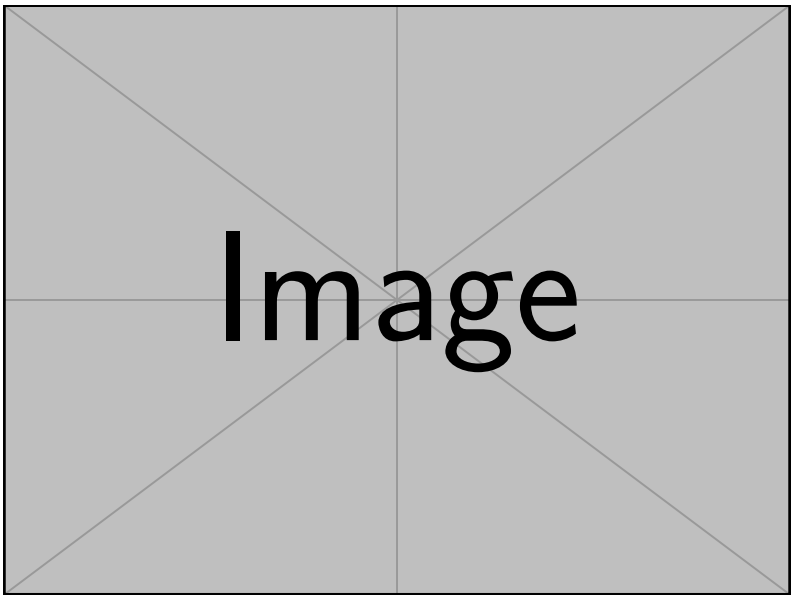

圖 / Figure 1: 研究架構占位圖 / Research Framework Placeholder
資料來源：LaTeX mwe 套件示範圖，非研究資料。
Source: Example image from the LaTeX mwe package; not research data.

Table 1 demonstrates a three-rule table. The column types `l`, `r`, and `X` mean left-aligned, right-aligned, and automatically wrapping columns.

4 跑票分析 / Analysis of Rebellion

4.1 公式排版 / Formatting Equations

行內公式以美元符號包住，例如 $r_i = d_i/n_i$。需要編號時使用 `equation` 環境：

Enclose inline mathematics in dollar signs, for example $r_i = d_i/n_i$. Use the `equation` environment for a numbered equation:

$$r_i = \frac{d_i}{n_i}, \qquad n_i > 0. \tag{1}$$

式 (1)中，d_i 為議員 i 的跑票次數，n_i 為參與表決次數。若沒有有效表決，應另行說明處理方式。

In Equation (1), d_i is the number of defections by legislator i, and n_i is the number of votes cast. Explain how observations with no valid votes are handled.

多行公式可使用 `align` 環境，以 `&` 對齊：

Use `align` for multiline equations, with `&` marking alignment points:

$$\eta_i = \alpha + \beta_1 x_{1i} + \beta_2 x_{2i}, \tag{2}$$

$$p_i = \frac{\exp(\eta_i)}{1 + \exp(\eta_i)}. \tag{3}$$

以上僅為公式排版示範；實際模型應由研究問題與資料結構決定。

These equations demonstrate formatting only; choose an actual model based on the research question and data structure.

4.2 結果與交叉引用 / Results and Cross-References

可引用第 2 節的理論、第 3 節的資料，或指出圖 1位於第 6 頁。請勿手動輸入圖表與公式編號，以免增刪內容後編號失去一致性。

Refer to the theory in Section 2, the data in Section 3, or Figure 1 on page 6. Use cross-reference commands so numbering stays correct when content changes.

5 結論 / Conclusion

在此回應研究問題，概述主要發現、研究限制與未來研究方向。撰寫正式報告時，請移除本版模的操作說明與練習內容。

Answer the research question, summarize the findings, and discuss limitations and future research. Remove the instructional text and exercises when preparing the final report.

A　常用指令速查表 / Common Command Quick Reference

依用途查找下列指令，將範例中的文字、檔名與標籤替換為自己的內容。

Find the command you need below and replace the sample text, filenames, and labels with your own.

用途 / Purpose	指令 / Command
章節 / Section	`\section{Title}`
小節 / Subsection	`\subsection{Title}`
次小節 / Subsubsection	`\subsubsection{Title}`
粗體 / Bold	`\textbf{Text}`
強調 / Emphasis	`\emph{Text}`
新段落 / New paragraph	原始碼空一行。/ Leave a blank line in the source.
註腳 / Footnote	`\footnote{Note}`
網址 / URL	`\url{https://example.org}`
連結文字 / Link text	`\href{https://example.org}{Text}`
特殊字元 / Special characters	`\% \& \_ \# \$ \{ \}`

圖片、表格與交叉引用 / Figures, Tables, and Cross-References

用途 / Purpose	指令 / Command
插入圖片 / Insert image	`\includegraphics[width=.7\linewidth]{file.pdf}`
圖表標題 / Caption	`\caption{Caption}`
設定標籤 / Set label	`\label{fig:example}`
引用圖表 / 章節 / Reference	`\ref{fig:example}`
引用所在頁 / Page reference	`\pageref{fig:example}`
表格水平線 / Table rules	`\toprule` / `\midrule` / `\bottomrule`
分隔欄 / 結束列 / Column / row	`&` / `\\`

文獻與公式 / Citations and Equations

用途 / Purpose	指令 / Command
作者式引用 / Narrative citation	`\textcite{cox1987}`
括號式引用 / Parenthetical citation	`\parencite{cox1987}`
附頁碼引用 / Cite pages	`\parencite[23--25]{cox1987}`
多篇引用 / Multiple sources	`\parencite{cox1987,carey2009}`
行內公式 / Inline math	`$r_i = d_i/n_i$`
分數 / 上下標 / Fraction / scripts	`\frac{a}{b}` / `x_i` / `x^2`
公式引用 / Equation reference	`\eqref{eq:example}`

常用環境 / Common Environments

下列區塊可直接複製。/ Copy and adapt the blocks below.

條列與編號 / Bulleted and Numbered Lists

```
\begin{itemize}          % 條列 / Bullets
  \item First point
  \item Second point
\end{itemize}

\begin{enumerate}        % 編號 / Numbers
  \item First step
  \item Second step
\end{enumerate}
```

圖片 / Figure

```
\begin{figure}[htbp]
  \centering
  \includegraphics[width=.7\linewidth]{example-image.pdf}
  \caption{圖說 / Figure caption}
  \label{fig:example}
\end{figure}
```

表格 / Table

```
\begin{table}[htbp]
  \centering
  \caption{表格標題 / Table caption}
  \label{tab:example}
  \begin{tabular}{lr}
    \toprule
    Item & Value \\
    \midrule
    A & 10 \\
    B & 20 \\
    \bottomrule
  \end{tabular}
\end{table}
```

編號公式 / Numbered Equation

```
\begin{equation}
  r_i = \frac{d_i}{n_i}
  \label{eq:example}
\end{equation}
```

新增文獻 / Adding a Reference 將下列格式加入 `reference.bib`，填入真實文獻資訊，再於內文使用相同的 key 引用。

Add an entry to `reference.bib`, replace the placeholder metadata with the actual source details, and cite the same key in the text.

```
@book{author2026,
  author    = {Surname, Given Name},
  title     = {Book Title},
  year      = {2026},
  publisher = {Publisher}
}
```

提醒 / Reminders

- 圖表的標籤放在圖說之後；文獻 key 須與資料庫一致。

  Put figure and table labels after captions; citation keys must match the bibliography.

- 範例頁碼須核對原文；圖片放在 `images/`。

  Verify citation pages against the source; store images in `images/`.

- 新增引用後重新編譯。

  Recompile after adding references.

A.1 文獻引用指令與實例 / Citation Commands and Examples

本模板已啟用 `natbib=true`，可使用下列指令；保留現有的 `biblatex` 與 Biber 設定，不需另外載入 `natbib` 套件。

We use the commands below through `biblatex`'s natbib compatibility option and retain Biber. We do not load the separate `natbib` package.

下表以 `reference.bib` 中的 `smith2020` 為例，右欄直接呈現編譯結果。Smith、Jones 與 Lee（2020）是虛構文獻，頁碼也僅供語法示範；正式報告請改用經核對的真實來源。

We use the fictional entry `smith2020` to compare the actual outputs. We replace the sample source and page number with verified references in a report.

指令 / Command	顯示效果與用途 / Output and Use
`\citet{smith2020}`	Smith et al. (2020) 句中主詞 / Narrative citation
`\citep{smith2020}`	(Smith et al., 2020) 括號引用 / Parenthetical citation
`\citet*{smith2020}`	Smith, Jones, and Lee (2020) 列出全部作者 / All authors
`\citep*{smith2020}`	(Smith, Jones, and Lee, 2020) 括號內列出全部作者 / All authors in parentheses
`\citeauthor{smith2020}`	Smith et al. 只顯示作者 / Author only
`\citeyear{smith2020}`	2020 只顯示年份 / Year only
`\citep[p.~12]{smith2020}`	(Smith et al., 2020, p. 12) 附頁碼引用 / Citation with a page number

句子範例 / Sentence Examples

```
\citet{smith2020} illustrate the citation format.
We illustrate a parenthetical citation \citep{smith2020}.
```

實際輸出 / Actual Output

Smith et al. (2020) illustrate the citation format.
We illustrate a parenthetical citation (Smith et al., 2020).

星號版本會完整列出作者；一般版本在三位以上作者時縮寫為 *et al.*。原本的 `\textcite` 與 `\parencite` 仍可使用。

We use starred versions for full author lists; ordinary citations abbreviate lists of three or more authors. We can also use `\textcite` and `\parencite`.
